	Hugh Jones	2128		
	Hugii Jones	2120		
The MAILING DATE of this communication apperature of the second allowable, PROSECUTION ON THE MERITS IS herewith (or previously mailed), a Notice of Allowance (PTOL-85) NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT R of the Office or upon petition by the applicant. See 37 CFR 1.313	(OR REMAINS) CLOSED or other appropriate comm IGHTS. This application is	in this application. If not inclu- nunication will be mailed in du-	aea e course. THIS	
1. This communication is responsive to <u>9/11/2000</u> .				
2. The allowed claim(s) is/are <u>3-29</u> .				
3. The drawings filed on 9/11/2000 are accepted by the Examiner.				
 4.				
Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application. THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.				
5. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.				
6. CORRECTED DRAWINGS (as "replacement sheets") mu (a) including changes required by the Notice of Draftsper 1) hereto or 2) to Paper No./Mail Date (b) including changes required by the attached Examiner Paper No./Mail Date Paper No./Mail Date Identifying indicia such as the application number (see 37 CFR each sheet: Replacement sheet(s) should be labeled as such in 7. DEPOSIT OF and/or INFORMATION about the deport	son's Patent Drawing Revi - 's Amendment / Comment 1.84(c)) should be written or the header according to 37 osit of BIOLOGICAL MA	or in the Office action of the drawings in the front (not to CFR 1.121(d). TERIAL must be submitted	eraanin . Liitti ee inii aa aan	
attached Examiner's comment regarding REQUIREMENT	FOR THE DEPOSIT OF E	BIOLOGICAL MATERIAL	,	
Attachment(s) 1. ☑ Notice of References Cited (PTO-892)	5 ☐ Notice of	Informal Patent Application (F	PTO-152)

DETAILED ACTION

<u>Introduction</u>

1. Claims 3-29 of U. S. Application 09/659,735 filed on 9/11/2000, are presented for examination. Claims 3-29 are allowed.

Allowable Subject Matter

- 2. Claims 3-29 are allowed over the prior art of record.
- 3. The following is an examiner's statement of reasons for allowance.
- 4. A prior art search has been carried out. The closest art of record is:
 - transistor selector mapping. Pass transistor synthesis is potentially important for semi-or full-custom design techniques. Pass transistors have the advantage that fewer transistors are needed, and that circuits with high fanin and small delay can be constructed. They present a an algorithm to address this problem, which is based an the idea of a general Boolean Oracle. The oracle is based on ATPG techniques, and compared to BDDs, the oracle has the advantage that failure to complete only affects optimization locally, and does not hinder optimization elsewhere in the logic. A limitation of BDDs is that it is difficult to complete the algorithm if a BDD grows too large.

Art Unit: 2128

Kumashiro et al. disclose a given logic circuit which is divided into a combinational circuit portion and a register portion. The combinational circuit portion obtained by division is divided into a plurality of partial circuits having high connectivity. Each partial circuit is converted into a circuit having the transistor level. Then, a layout cell of the partial circuit having the transistor level is generated. Thereafter, arrangement and wiring are performed by using, as unit cells, a layout cell which corresponds to each register included in the register portion and the layout cell for each partial circuit in the combinational circuit so that a block layout is created. Accordingly, a layout having excellent characteristics can be created by a few kinds of cells in both circuits having the CMOS logic and the passtransistor logic. In particular, the partial circuits having high connectivity are arranged in a cell in the circuit using the pass-transistor logic.

5. However, the prior art of record, while disclosing synthesis of logic circuits, including pass transistor circuits, with the use of binary decision diagrams, does not disclose or suggest the last limitation of the independent claims, namely:

"wherein said another partial diagram comprises one node which is used instead of said plurality of nodes, and a plurality of nodes which generate logical combination of a plurality of control variables each supplied to one

Art Unit: 2128

of said plurality of nodes included in said one partial diagram, and supplies said logical combination to said one node as a control variable," in the context of the claims.

- 6. Therefore, claims 3-29 are allowed over the prior art of record.
- 7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be:

directed to: Dr. Hugh Jones telephone number (703) 305-0023, Monday-Thursday 0830 to 0700 ET, *or* the examiner's supervisor, Kevin Teska, telephone number (703) 305-9704. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist, telephone number (703) 305-3900.

mailed to: Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to: (703) 308-9051 (for formal communications intended for entry) or

(703) 308-1396 (for informal or draft communications, please label *PROPOSED* or *DRAFT*).
